PAPER SORTING SYSTEMS

Paper Sorting Systems

Recycled paper sold to paper brokers or paper mills has a dollar value. Removal of contaminants from the paper flow can increase the paper's value by forty to sixty percent.

Ameri-Shred sorting systems are custom designed to meet your specific application and requirements. Basic systems include free standing conveyors while automatic systems include metering systems and/or mezzanines.

Standard Options:

- Various lengths and belt widths for sorting conveyors
- Variable speed with foot controls
- Portable; due to legs with casters
- In ground metering with pit or above ground with hopper
- Mezzanine and bunker systems

◇ Paper Sorting Systems Can Quickly Pay For Themselves ◇

- Paper is graded according to its purity.
 - Paper grades include, but are not limited to mixed office paper, sorted office paper and white ledger.
 - Computer printouts, newsprint and corrugated also have separate grades.
 - It is best not to mix them in with your office paper or commingle them together.
