◇ Mobile Shred Truck Unloading Conveyor ◇

## SHRED TRUCK UNLOADING CONVEYOR AMS-Bypass Conveyor

The AMS-Bypass conveyor was designed to unload mobile shredding trucks by transferring the shredded documents from the truck directly to a baler.

This eliminates the need to run previously shredded material through a secondary shredder unless desired.

### Benefits:

- Eliminates the dust created by re-shredding
- Provides flexibility
- Eliminates the need for an auxiliary baler feed conveyor
- Maximizes floor space efficiency
- Saves wear & tear on your shredder
- Saves time, labor & unnecessary energy consumption
- Minimal building requirements
